COCONUT SHELL CHARCOAL

Carbonised coconut shell, natural and mesh grades.

Origin: North Sumatra, Indonesia

Loading port: Belawan, Medan

Minimum order: 13 tons

01 / THE PRODUCT

COCONUT SHELL CHARCOAL

Coconut shell charcoal is made by carbonising coconut shells in a controlled, low-oxygen process. The result is a hard, high-carbon charcoal used as a base material for briquettes, activated carbon and industrial fuel.

It burns cleaner and longer than ordinary wood

MINIMUM ORDER (MOQ)	13 tons and multiples

PRICE NOTE

Price varies with raw material and freight market conditions -- confirmed per shipment. Contact us for a current quotation.

SIEVED CHARCOAL, READY FOR PACKING

03 / PACKING & LOGISTICS

PACKING, LOADING AND STORAGE

PACKING

PP bag, standard export packing

Alternative packing available on buyer's request.

LOAD PER CONTAINER

FCL 20 ft — 20t

FCL 40 ft — 40t

PACKED BAGS STACKED AT THE WAREHOUSE

LOADED TRUCK, READY FOR SHIPMENT

STORAGE RECOMMENDATION

Keep it dry and clean.

Store in a dry, clean area away from moisture and open flame. Damp conditions can affect ash and moisture readings, and good storage keeps the charcoal export-ready.

Container weights follow the producer's figures (20 ft: 20 t, 40 ft: 40 t).

04 / TERMS & DOCUMENTS

TERMS AND DOCUMENTS

PAYMENT

TT or L/C

Telegraphic transfer, or irrevocable letter of credit

INCOTERMS

FOB / CNF / CIF
